

Resolved Issues

1. Resolved a script error causing the map view of GPS tracking to not set focus on the correct map area. (Issue #4432)
2. Corrected an issue resulting in employee times being duplicated in QuickBooks® when posting from Enter Completed Work Orders. (Issue #4378)
3. Fixed an issue causing Smart Routes to incorrectly schedule start and end times when the “End Time for the Day” is selected. (Issue #4364)
4. Corrected an issue preventing batch invoices from posting to QuickBooks® if a modified, renamed, or deleted item was used. (Issue #4349)
5. Resolved an issue where Smart Routes would not notify the user when confirmed jobs were included in Advanced Routing. (Issue #3718)
6. Corrected an issue where history records with additional times were not able to be deleted. (Issue #2068)
7. Added reporting functionality for job memo in job reports. (Issue #3249)
8. Revised asset picture size constraints. (Issue #3938)
9. Resolved an issue where marking a recurrence as “skipped” would still create an invoice in QuickBooks®. (Issue #4141)
10. Added the ability to set a default color for <blank> in custom color coding. (Issue #4272)
11. Fixed the “reorder” function inside of Smart Routes. (Issue #4348)
12. Improved performance of Purchase Order syncing with QuickBooks® online. (Issue #4381)
13. Resolved an issue where QuickBooks® estimates with group items could not be synced to Smart Service. (Issue #4387)
14. Revised a Smart Routes error occurring when customer / job names contained special characters. (Issue #4395)
15. Added the ability to include fields for first, middle, and last name in the mass record update utility. (Issue #4399)
16. Corrected the background image display in the correspondence edit screen. (Issue #4419)
17. Fixed an issue in contacts search where searching for a record could display a warning message before displaying results. (Issue #4420)
18. Resolved an issue preventing jobs marked as taxable with a payment item added from posting to QuickBooks®. (Issue #4436)
19. Standardized program terminology for Estimates as specified by the user in Setup. (Issues #4422 & #4402)
20. Removed “record has been modified by another user” warning when updating job description in a job selected in the Mobile Workforce screen. (Issue #4290)

21. Corrected an issue preventing printing mailing labels for prospects in reporting. (Issue #4245)
22. Fixed an issue where Mobile Workforce would incorrectly display the number of jobs dispatched to the device. (Issue #3932)
23. Resolved an issue where Smart Routes would not display waypoints for more than 25 stops in the Advanced Routing itinerary. (Issue #4440)
24. Corrected an issue where Smart Service could not pull more than 100 tax items from QuickBooks® Online. (Issue #4425)
