

Resolved Issues

1. Corrected an issue where inactive employees would appear as a selectable option for advanced routing. (Issue #5350)
2. Resolved an issue where clicking on “Receive” items multiple times quickly would cause billable items to be added multiple times. (Issue #5393)
3. Fixed an issue where smart Service would freeze when unlocking job items. (Issue #5625)
4. Corrected an issue where Batch posting to QuickBooks would generate an invoice regardless of posting preference. (Issue #5645)
5. Resolved an issue where the “Edit Time by Employee” option in Post Timesheets would not filter to a single employee. (Issue #5736)
6. Fixed an issue where scheduled dates would not appear on history records after updating to 99.1 (Issue #5743)
7. Resolved an issue where 99.1 could not be installed on a new workstation. (Issue #5747)
8. Corrected an issue where timestamps from older version could not be converted to the new time tracking system. (Issue #5732)
9. Resolved an issue where the batch posting screen would fail to display invoices when the scheduled start or completed date was missing from a job. (Issue #5751)
