

Enhancements

1. Estimates converted into customer jobs will now transfer the “Active” status to the job record instead of the “Pending” status. (Enhancement #6424)
2. Adjusted the color scheme for the current date on the Smart Pane. (Enhancement #6583)

Resolved Issues

1. Resolved an issue where inactive QuickBooks “bin locations” would prevent invoices from posting to QuickBooks. (Issue #6742)
2. Fixed an issue where the “Custom” date range option in Post Work Orders would not display the selected day. (Issue #6624)
3. Corrected an issue where Email Job Reminders would encounter a job missing an email and fail to send emails to subsequent jobs in the list. (Issue #6546)
4. Added fields to column customizer in Contact Search. (Issue #6526)
5. Resolved an issue where apostrophes would cause issues when using “history item” filters on reports. (Issue #6449)
6. Added an option to remove older GPS data from Smart Service via SQL query. (Issue #1939)
7. Corrected an issue where the reminder to schedule a job would prompt with an error once used. (Issue #2759)
